

Your Truck is an Investment! Protect It!

Every day we rely on protective gear to keep us safe, dry, and unharmed. But what about your pallet truck? What kinds of harsh conditions is it being exposed to? And what are you doing to protect it?

The Truck Gard™ covers the entire outer chassis of your pallet truck, protecting all electrical components from water, chemicals, and other potential contaminants including:

- Saltwater in fish processing
- Blood and product in meat processing
- Liquids and powders in food, chemical, and pharmaceutical processing
- Rain, snow and salt in outdoor loading and unloading

Clean environments such as laboratories, hospitals, and chemical processing facilities are also protected from contaminants that may exist on the pallet truck.

Product Features

- Clear poly view ports & access panels ensure all gauges, placards, instrumentation and safety switches remain visible and fully accessible
- Easy access to the handle/throttle controls, even with gloves on
- High impact bumper and vertical corner reinforcements
- Fully vented for safety
- Easy battery charging with a removable panel that covers the battery, battery charger and battery cables
- Installation takes only 60 seconds!

The Truck Gard™ is made up of two components, sold separately. **Component A** protects the back of your unit, including the handle, gauges, and controls while **Component B** protects the front of the pallet truck. Both components are compatible with a standard Raymond 102XM, components for non-standard 102XM also available.

The Truck Gard™ is compatible with the Raymond 102XM and other various brands of pallet trucks. Get yours today!
