

# BRAMI<sup>®</sup>

**— PLATFORMS**

COMPANY PROFILE

## Innovation and safety at height.

Advanced technological solutions for safer and more efficient operations, designed to meet the needs of every sector.

# Our history: a journey of innovation.

1980

Founded in 1980 by Pierino Bravi, the company began as Braviisol, specializing in the industrial installation of partition walls and ceilings.

1986

The need for more efficient tools for working at height led to the design of the first self-propelled mobile platform in 1986.

1995

In 1995 the first hydraulic lift models were introduced, which would evolve into the current Leonardo HD, today the flagship model of the Bravi Platforms range.

2010

With the expansion of production and the launch of new picking solutions, Bravi Platforms consolidates its global presence and continues to innovate the industry.

Today

Bravi Platforms opens the new production facility, and expands its offer with the launch of the Residential 170 – opening doors to new markets — alongside the completion of the Leonardo range.

# Compact solutions for every low-level work need.

## Aerial Platforms

### Leonardo HD

Bravi's flagship model: compact and versatile platform for construction sites, maintenance and plant operations.

### Leonardo HD 430

The same Leonardo HD performance optimized for indoor environments and with a higher reach.

### Lui 460

The highest of the range designed to accommodate up to two operators.

### Residential 170

The lightest, most compact platform, perfect for residential jobsites.

## Picking range

### Sprint

The platform for efficient and safe professional picking, ideal for warehouse and large-scale retail.

### Sprint Large Parcels

The ideal solution for easy handling of bulky and heavy parcels.

### Sprint Tire Lifter

The safest and fastest option for handling tires with precision and reliability.

### Spin-Go

Manual picking for material handling in tight retail and warehouse environments.

# Target and application areas.

Bravi Platforms addresses several strategic stakeholders in the material handling sector, offering advanced solutions to increase safety and operational efficiency.

## Rental companies

Bravi provides highly reliable platforms designed to minimize maintenance costs and maximize return on investment. The innovation behind its products ensures durability and user-friendliness, key elements for the rental industry.

## Equipment dealers

To broaden the product offering the company offers technologically advanced and easy-to-manage solutions, allowing partners to differentiate themselves in the market with intuitive, high-performance units.

## Professional Sectors

Bravi products are ideal for a wide range of professional applications, including construction, industrial maintenance, logistics and retail.

They offer greater safety than traditional equipment, reducing the risk of accidents and improving operational productivity.

# Leonardo Range

From maintenance to logistics, and from plant operations to final fit outs, the Leonardo platforms ensure efficiency and reliability in every low-height application.

The Leonardo range is Bravi's solution for working at low heights. Originally launched with the LUI 460 model and Leonardo HD – now the flagship and standard for compactness, safety, and autonomy — the range has expanded with the Leonardo HD 430, providing greater working height while maintaining the same maneuverability.

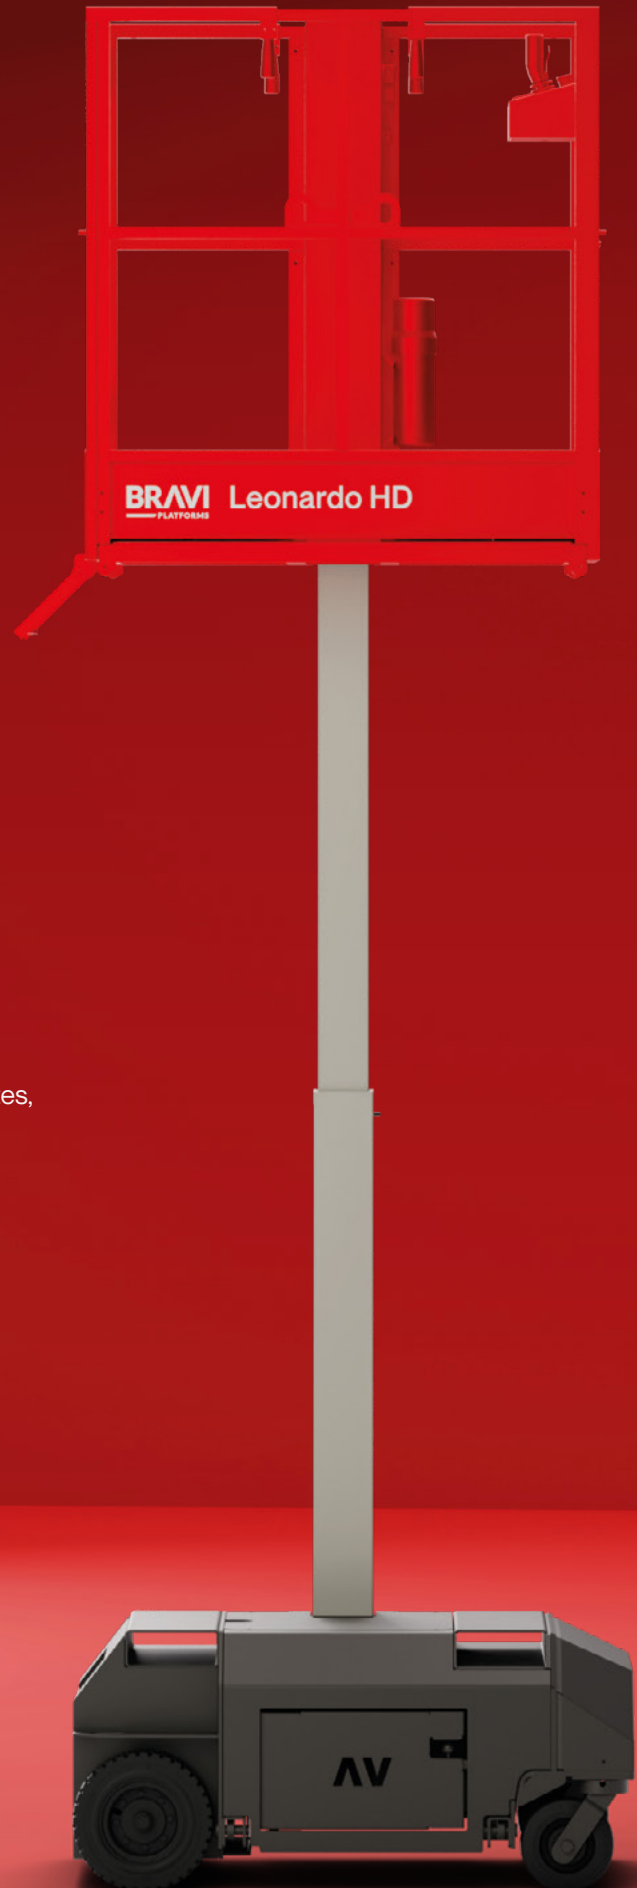

The Leonardo range includes the iconic Leonardo HD, the higher version Leonardo HD 430, and the LUI 460 model.

# Leonardo HD: the future of working at low heights.

Leonardo HD is the ultimate solution for working below 5 m, born to replace ladders and scaffolds with a safe, versatile and compact tool.

**Engineered to increase productivity and reduce risks, it optimizes execution times with quick repositioning and user-friendliness.**

Its design allows smooth access through standard doors, elevators and tight spaces, making it ideal for construction sites, logistics and industrial maintenance. The robust structure ensures a long life cycle and reduced maintenance costs.

# Residential 170

The first platform designed for residential construction.

With Residential 170, Bravi Platforms meets the needs of the residential construction sector.

Approximately 33% of indoor construction sites worldwide involve residential buildings, and Residential 170 is the first platform specifically tailored for this market. Its design focuses on operator safety, comfort, and productivity. With Residential 170, we're redefining the way work is done on the jobsite.

Residential 170 is not just a new product: it's a cultural and operational shift. It brings safety, efficiency, and professionalism to a range of key stakeholders in the construction and working-at-height sectors.

# Designed to replace everything else.

A unique platform designed to replace manual solutions such as ladders and scaffolds and, making daily works safe and more efficient. Perfect for every phase of the jobsite, from early stages to final fit outs.

With a width of just 66 cm (2 ft 2 in) and a height of 174 cm (68 in), Residential 170 fits every space.

It is optimized for low ceilings and tight spaces, with a maximum platform height of 1.7 m (5 ft 7 in) (working height of 3.7 m /12 ft 2 in). Its lightweight design of 360 kg (794 lbs) allows it to operate safely on finished floorings and slabs.

# Picking

The order picker lineup features three Sprint models and the Spin-Go, designed to meet every logistical need.

Spin-Go

Sprint Tire Lifter

Sprint Large Parcels

## The perfect range for picking.

Sprint, Sprint LP, and Sprint TL for a fully motorized handling and lifting of goods, up to 5 m (17 ft). Spin-Go, a manual push-around with motorized lifting system, is perfect for retail and warehouses with limited spaces.

Sprint

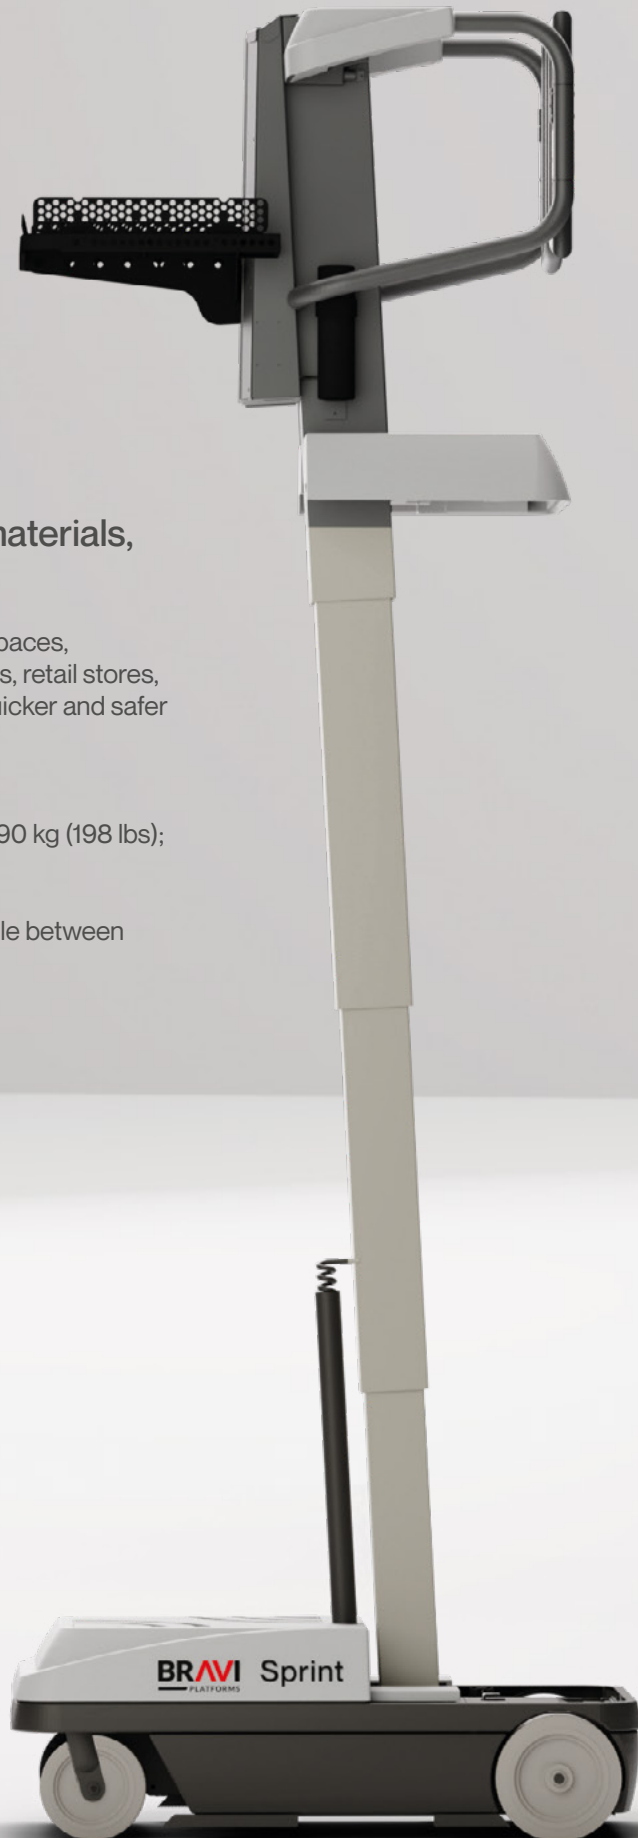

# Sprint: Productivity and safety without compromise.

Sprint is the picking platform that eliminates the use of ladders, improving safety and efficiency.

## It simultaneously lifts operator and materials, optimizing work time.

The ultra compact design allows operation in tight spaces, reducing the risk of injuries. Perfect for supermarkets, retail stores, warehouses, and distribution centers it ensures a quicker and safer workflow.

- Working height up to 5.35 m (17 ft 6 in);
- Motorized adjustable load tray with capacity up to 90 kg (198 lbs);
- Load deck with capacity up to 113 kg (249 lbs);
- Maximum maneuverability with 0° turning radius;
- Premium 245 Ah batteries for a longer working cycle between charges, up to two shifts.

# Our services:

## Made in Italy production

The full Bravi Platforms range is designed and manufactured in our production facility located in Italy.

## Global presence

Bravi Platforms works in 48 countries and serves over 740 customers worldwide. It operates with the highest quality standards and it is ISO 9001:2015 certified. The products are compliant to the CE and UL/CSA standards.

## Service and spare parts

Through Bravi Parts, the company guarantees fast after-sales service and original spare parts within 48/72 hours, reducing downtime and ensuring operational continuity.

## Technical and sales training

Bravi Platforms supports customers and partners with technical and commercial trainings - both in-person and online - to boost safety, expertise, and product knowledge.
