JOHNSTON EQUIPMENT
Overview

Visit us at www.johnstonequipment.com

When you need to **move**, **manage**, **store** and **protect**™ goods, Johnston Equipment's Complete Solutions™ will help you to **Run Better. Manage Smarter.**™

MOVE

RAYMOND, BT AND OTHER EQUIPMENT

Increase efficiency and lower costs throughout your material handling operations with top-notch quality and a reliable range of equipment options.

BATTERIES & ACCESSORIES

We bring together the quality, selection, warranty, service and pricing of Canada's top battery suppliers - including end-of-life battery programs.

RENTALS & RENEWED

Accommodate for peak periods and seasonality through our **Ready.**

Right. Now.™ rentals and/or optimize your fleet and costs with quality, cost-effective **Raymond RENEWED**™ equipment.

DOCKS & DOORS

Maximize productivity and cost management by relying on a single provider for service and reporting.

MANAGE

PARTS & SERVICE

Quick access to over 7 million parts for any make and model of forklift, and guaranteed service on all brands.

LEASING & FINANCING

Reduce your total cost of ownership, while improving your fleet flexibility, to help you grow and manage your business both now and in the future.

COMPLETE FLEET®

Ensures consistent, quality service on all makes and models in your fleet, along with increased visibility into your equipment's total cost of ownership.

TELEMATICS

Experience unprecedented visibility into the efficiency of your material handling fleet, and the efficacy of your operators, with **iWAREHOUSE**® - all conveniently viewable through a single web portal.

STORE

RACKING STORAGE & PLATFORMS

Optimize your warehouse to increase pallet positions, maximize through-put and reduce labor costs, all delivered with exceptional manufacturing quality and service.

ENGINEERING AND PROJECT MANAGEMENT

Innovative, flexible, tailored solutions designed and implemented to the highest quality, safety and legislative standards.

USED RACKING-SHELVING & BUYBACKS

A cost-effective alternative when adding to an existing system or opening up new storage space in your warehouse. We can also help you clear out excess shelving.

STORAGE SYSTEMS

Use floor space more efficiently, increase order selection productivity and improve workplace ergonomics at the total lowest operational cost.

PROTECT

IDEAL MAINTENANCE®

Equipment maintenance that has been optimized for quality, speed and safety.

Ideal Maintenance delivers unappalled service consistency across our national technician base.

FIXED-PRICE MAINTENANCE PLANS

Enjoy the benefits of our **Ideal Maintenance** service program while stabilizing your lift truck maintenance costs across your entire fleet.

TRAINING

The only nationally-accessible, accredited comprehensive operator training programs to create consistency across an employee base that is small, large or anywhere in between; delivered through convenient in-person and online formats.

EXTENDED WARRANTY

The best factory protection in the industry for your new truck, with double the powertrain protection.

Storage Solutions

WHICH STORAGE SOLUTION IS RIGHT FOR YOU?

Whether it be for home, retail, commercial or industrial purposes, we can help you better utilize your space and get you organized. We offer a vast array of product storage solutions to suit your business; from easy to assemble steel shelving to multi-level pick modules for large distribution centres.

This three page section provides brief illustrated summaries, operational considerations and benefits for some of the most common product storage solutions we offer, while also putting into plain words, typical shelving, racking and storage systems terminology.

We have many standard "In Stock" storage solutions that can be shipped within 48 hours, or we can provide customized storage solutions that take into account the unique requirements of your business. Our staff of pallet rack and shelving experts can help you determine the optimum solution for your business.

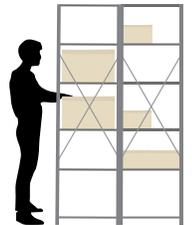

We carry Canada's largest stock of **NEW & USED** material at affordable, everyday pricing. If **USED** material is an option you'd like to consider, refer to back cover for additional information.

NO-BOLT SHELVING

OPERATIONAL CONSIDERATIONS

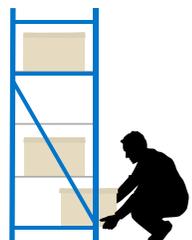

- Ideal for medium case and piece pick applications
- Heavy Duty industrial steel shelves
- Boltless shelves – special clips allow quick adjustment of shelf heights
- Baked enamel finish
- Typical shelf widths 36", 42" and 48"

WIDE SPAN SHELVING

OPERATIONAL CONSIDERATIONS

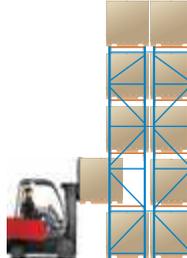

- Fast, easy assembly
- Ideal for record storage, retail and grocery applications
- Great for hand stacking operations
- Can be fitted with wire mesh decks, wood decks, or galvanized drop-in-panels
- Bay widths typically 48", 72" or 96"

SELECTIVE RACK

OPERATIONAL CONSIDERATIONS

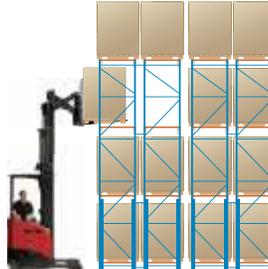

- Advantageous for high SKU counts, with pallet in/pallet out or pallet in/ case out movements
- Superb selectivity, improved productivity
- Every pallet has a facing
- Flexible - no special lift trucks required
- Maintains FIFO (First in, First Out)

DOUBLE DEEP RACK

OPERATIONAL CONSIDERATIONS

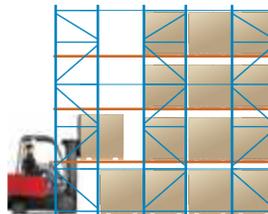

- Advantageous for low to medium SKU counts, with pallet in/pallet out movements
- Selectivity reduced 50% vs. Single Selective Rack
- Utilizes deep reach lift trucks
- Modified FIFO (First In, First Out)

DRIVE-IN RACK

OPERATIONAL CONSIDERATIONS

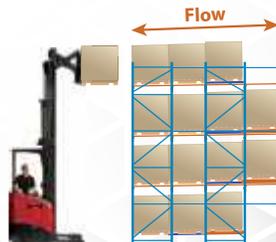

- Advantageous for low SKU counts, with medium to high activity and pallet in/pallet out movements
- Flexible - uses counterbalanced lift trucks or reach trucks
- Maintains LIFO (Last In, First Out)

PUSH BACK RACK

OPERATIONAL CONSIDERATIONS

- Advantageous for medium to high SKU counts, with medium to high activity and pallet in/pallet out movements
- Flexible - suitable for use with either counterbalanced or reach lift trucks
- All pallets are accessed from the aisle
- Typically LIFO within the lane

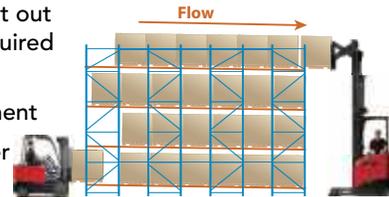

Storage Solutions

PALLET FLOW RACK

OPERATIONAL CONSIDERATIONS

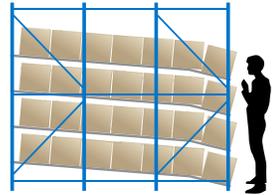

- Advantageous for low SKU counts, with high activity and pallet in/pallet out movement, where strict FIFO is required
- Eliminates lift truck contention by segregating picking and replenishment
- Flexible - suitable for use with either counterbalanced or reach lift trucks

CARTON FLOW

OPERATIONAL CONSIDERATIONS

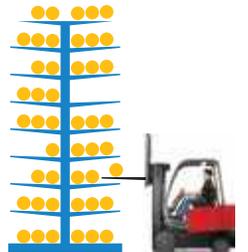

- Improves pick rates
- Ideal for full case and split case picking
- Separates replenishment from picking activity, eliminating contention
- Can be integrated with standard pallet rack, allowing replenishment storage above

CANTILEVER RACK

OPERATIONAL CONSIDERATIONS

- Suited to items such as building materials, piping, rolls, furniture and sheet goods
- Arm heights are adjustable to suit product spacing requirements
- Can be configured as single-sided or double-sided
- Use with counterbalanced or reach truck

RAISED PLATFORMS (MEZZANINES)

OPERATIONAL CONSIDERATIONS

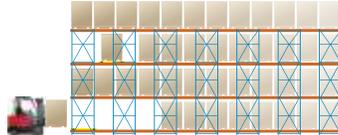

- Provides wide spans with minimal column interference at lower levels
- Multi-Functional - use with standalone shelving, carton flow & wide span shelving
- Multiple flooring options available
- May be dismantled and relocated
- Customizable

PALLET SHUTTLE

OPERATIONAL CONSIDERATIONS

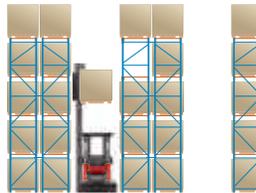

- High density semi-automated storage and retrieval system
- Advantageous for low SKU counts with high activity and pallet in/pallet out movements
- Flexible - suitable for use with either counter-balanced or reach lift trucks
- Can be configured for FIFO or LIFO

VNA (VERY NARROW AISLE)

OPERATIONAL CONSIDERATIONS

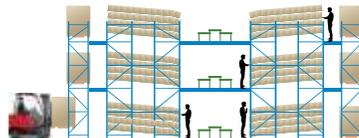

- Advantageous for high SKU counts with pallet in/ pallet out movements
- 100% pallet selectivity
- Can pick cases at elevated levels with order picker truck
- Utilizes specialized VNA lift trucks
- Maintains FIFO (First in, First out)

PICK MODULE (RACK BASED)

OPERATIONAL CONSIDERATIONS

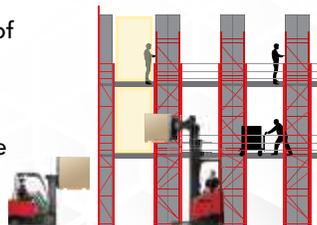

- Ideal for high throughput case and piece pick operations
- Typical pick module systems may utilize pallet flow, carton flow and shelving
- Can be built as 2,3 and 4 level systems to suit customer's requirements
- Engineered to meet all national and local building codes

PICK MODULE (SHELVING BASED)

OPERATIONAL CONSIDERATIONS

- Ideal for operations with a high number of SKU's involving small parts storage and piece pick operations
- Can incorporate security panels for high value items or controlled product storage
- Multi-level systems can be built to suit the customer's specific needs
- Engineered to conform to all national and local building codes

Roll Formed Racking

We stock Canada's largest, most extensive line of roll formed racking products. Whether you're looking for racking to suit a small retail operation or a large distribution centre, we have been provide the best product storage solutions throughout Canada. Our racking and shelving based storage solutions can be found throughout Canada's warehouses and distribution centres.

Our roll formed racking line forms the base from which we can build many unique, customer focused product storage solutions.

- Selective Pallet Rack
- Double Deep Rack
- Push Back Rack
- Cantilever Rack
- Pick Modules
- Bolted Pallet Rack
- Drive-In Rack
- Pallet Flow Rack
- Carton Flow Rack
- Very Narrow Aisle

All of our roll formed racking products come with a durable powder coated finish.

Call for a free, no-hassle consultation with one of our storage solutions experts.

WELDED PALLET RACK

BOLTED PALLET RACK

WILL USED FIT THE BILL?

We have Canada's largest selection of used racking and shelving.

We keep material in stock throughout the country, in or near most major urban centres and can quickly service outlying areas from our branch offices.

See page 32 for further details on used material

Structural Racking

SELECTIVE PALLET RACK

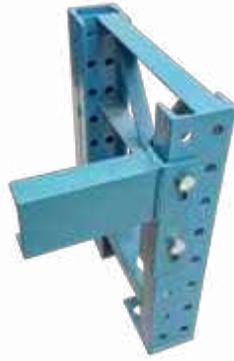

PUSH BACK RACK

PALLET FLOW RACK

**Strongest Push Back
in the Industry**

Structural Racking

Johnston's unique structural steel racking and product storage systems are made from high strength, hot rolled structural steel shapes supplied by state-of-the-art North American mills. Our structural steel racking and product storage systems are the most durable in the industry and are extremely well suited to the toughest warehouse conditions such as those found in food and grocery operations.

We offer a full range of extra-rugged structural steel racking products and storage systems including:

- Selective Pallet Rack
- Push Back Rack - 2 to 6 Deep
- Double Deep Rack
- Furniture Rack
- Drive-In/Drive-Thru Rack
- Pallet Flow Rack
- Multi-Level Pick Modules
- Very Narrow Aisle (VNA) Rack

Safety Bars & Accessories

Utilized to prevent misplaced pallets from accidentally falling through the beams; safety bars give an added level of safety and protection for pallet racking. Safety bars are available to suit Built-In Step Beams and Box Beams.

SNAP-IN SAFETY BARS

Our Pre-Galvanized Snap-In Safety Bar snaps into place on pre-punched, built-in step beams. The safety bar locks in place, providing maximum protection for people and equipment and it meets CSA standards without requiring mechanical fastening.

Precision formed from high strength steel, it's able to withstand years of abuse.

Standard sizes in stock and ready to ship

SNAP-IN PALLET SAFETY BAR

HOOK-OVER SAFETY BARS

Our hook-over safety bars are manufactured from the same high strength steel as our beams and are available with cups to suit 1-1/2" (40 mm) or 2" (50 mm) beam depths. Each cup on the safety bar comes with a pre-punched hole for mechanically fastening the safety bar to the beam.

Our hook-over safety bars work with both box and step beams.

Standard sizes in stock and ready to ship

HOOK-OVER SAFETY BAR

SAFETY CLIPS

Those small clips, pins or fasteners that come with your box or step beams are extremely important safety items for your racking. They prevent unintentional beam uplift, caused by lift trucks, from dislodging your beams. Always make sure they are in place. Call us if you need replacements.

SAFETY

Bars, Clips & Netting

Our rack guard safety netting systems offer a simple, affordable means of preventing packages from falling onto workstations below or onto adjacent walkways, protecting personnel from injury and packages from damage. Constructed of strong, durable, braided nylon rope.

SAFETY NETTING

- Protect employees from falling cartons and packages
- Reduce product damage
- Can be installed vertically or horizontally to suit your protection needs
- Affordable and easy to install
- Protection for entire rows of racking or individual bays
- Kits can be provided for your specific needs
- We can provide professional installation

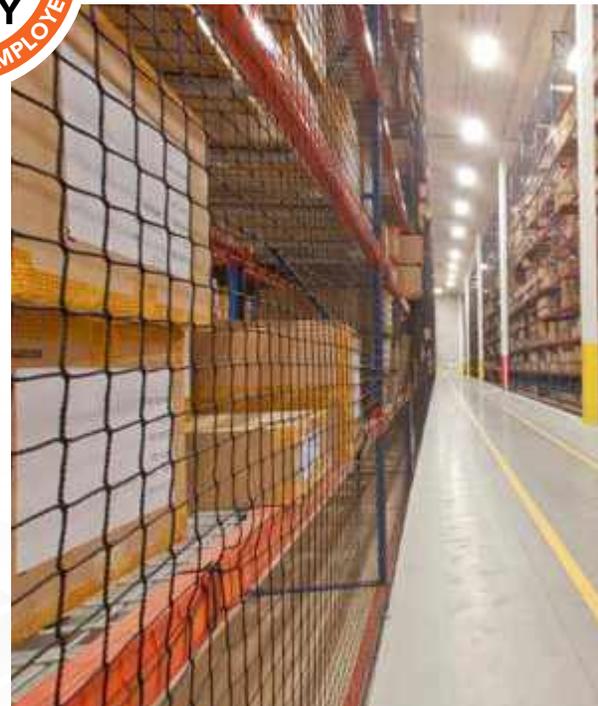

HORIZONTAL SAFETY NETTING

WIRE MESH RACK GUARD

- Provides similar protection for employees as our safety netting but in a rigid form
- Helps reduce product damage
- Installs quickly as easily with nuts and bolts
- Available in standard and custom sizes
- Affordable walkway and work area protection

VERTICAL SAFETY NETTING

Wire Mesh Decks

OUTSIDE WATERFALL

INSIDE WATERFALL

INVERTED FLARED CHANNEL

WIRE MESH DECKS

Available in a wide range of configurations we can provide wire mesh decks to suit Step Beams, Box Beams and Structural Channel Beams. Wire Mesh Decks can be used as an alternative to standard safety bars, providing an extra level of safety for misplaced pallets as well as varying sizes of pallets. Unlike plywood or particle board decks, wire mesh decks are non-flammable and provide superior water access for sprinkler systems.

"NOT ALL WIRE MESH DECKING IS CREATED EQUAL"

BENEFITS

- Made in North America by the one of the industries most trusted, R-Mark certified companies.
- Certified Capacity Rating from Manufacturer
- No tools are required for installation - simply drop them in place
- Provide better hygiene than wooden decks
- Easier load identification
- Non - flammable
- Power coated finish
- Custom sizes, colours and configurations available (may extend lead time)
- Meets safety requirements for tunnel bays

Decks & Accessories

CARTON STOP

HANGING DIVIDER

KWIK KLIP DIVIDER

WIRE MESH DECK ACCESSORIES

Enhance the benefits of wire mesh decks by using these functional and simple to install accessories. A wide range of standard and custom accessories are available to help with slotting, placement and fire protection of your products.

BENEFITS

- Made in North America by the one of the industries most trusted, R-Mark certified companies.
- No tools are required for installation
- Easy to move for changing product slot sizing
- Durable all-steel construction
- Non-Flammable
- Powder Coated Finish
- Custom sizes, colours and configurations available (*may extend lead time*)

Protection & Guarding

RACK PROTECTION & GUARDING

Heavy Duty Guard Rails can greatly enhance the safety of your facility and reduce the cost of damage caused by accidental collisions. When properly installed, these rugged guard rails can withstand a 10,000 lb. impact at a speed of 4 mph. The guard rail specifications are as follows:

GUARD RAILS

Heavy Duty Guard Rails can greatly enhance the safety of your facility and reduce the cost of damage caused by accidental collisions when properly installed with manufacturer approved hardware.

BENEFITS

- Finished in highly visible security yellow
- 5" x 5" posts
- 12" high rails
- Security cap on all posts
- Bolted connections
- 10" x 10" base plates

WORKSTATION GUARDING

ROW END PROTECTORS

Heavy Duty Rack Guards provide protection for the most vulnerable areas of your storage rack systems – row ends. Available as double-sided or single-sided, they are easy to install and provide critical protection from fork truck damage at both the front and side of your rack uprights.

END OF AISLE PROTECTION

RACK FLOOR GUARDS

These medium duty rack guards provide excellent protection for the most vulnerable areas of your storage rack systems – row ends. Available as double sided or single sided, they are easy to install and provide critical protection from fork truck damage at both the front and side of your rack uprights.

Protection & Guarding

BUILDING COLUMN GUARDS

SINGLE HIGH GUARD RAIL

RACK POST PROTECTOR

POST PROTECTORS

Post Protectors provide individual, high visibility post protection and are available in 3 different standard sizes. Easy to install, they protect the most susceptible part of your rack uprights from fork truck damage.

BOLT-ON POST PROTECTORS

COLUMN SENTRY®

Column Sentry® is the original, patented column protector, protecting interior building columns and rack posts from forklifts collisions by surrounding them with a cushion of air. This column protector is highly visible in its standard safety yellow colour. When hit, Column Sentry flexes, to help protect the column, the forklift, and the forklift operator.

The protector is molded of low-density polyethylene, making it tough while keeping it maintenance free. It is also very easy to install, without using any tools, and is available in a number of sizes to fit almost every column.

POST PROTECTION

BUILDING COLUMN GUARDS

BENEFITS

- Installs easily by hand in just seconds
- Low purchase, installation and replacement cost
- Absorbs substantial fork lift impacts
- Ingenious design securely grips the post with no separate fasteners
- Effective in cold environments as low as -40° C
- Available to suit many types of rack post profiles

Bolted Pallet Rack

Operational Considerations

BENEFITS

- Reduced freight costs
- Easy to reconfigure & relocate
- Pre-engineered connections
- Reduced maintenance & repair costs
- Reduces potential freight damage
- Easier integration of accessories
- Powder Coated & Pre-Galv materials provide superior rust resistance
- Great resale value

Our bolted product line can be easily adapted or reconfigured into the design of all storage system applications, including pallet flow, push back and drive-in racking!

SHUTTLE Radioshuttle

INDUSTRY LEADERS IN HIGH-DENSITY STORAGE SYSTEMS

RADIOSHUTTLE

Pallets are unloaded and loaded into the system from the first or "Home" position at either end with a Pallet Shuttle Cart. The cart is designed to transport pallets being stored into the system, and retrieve the pallets as needed for shipment.

The self-powered Pallet Shuttle cart is easily moved between lanes as required with a standard lift truck.

OPERATIONAL BENEFITS & CONSIDERATIONS

- High Density Semi-Automated Storage and Retrieval System
- Intelligent carts store and retrieve pallets, as instructed by operator using remote-controlled radio transmitter
- Carts are easily transferred between lanes with a lift truck
- Can be utilized with customer's existing WMS (Warehouse Management System)
- Can be integrated with other rack systems or with fully automated storage and retrieval systems
- Advantageous for low SKU counts, with high activity and pallet in/pallet out movement
- Flexible – suitable for use with either counter-balanced or reach lift trucks
- Powered by light weight lithium ION battery packs
- Standard lift capacity of 3,400
- Suitable for ambient, cooler and freezer applications
- Can be configured for either FIFO (First In, First Out) LIFO (Last In, First Out) applications

SPACE UTILIZATION EFFICIENCIES

- The most space efficient pallet storage product available
- Variable pallet lane depths

Raised Storage Platforms

Double or triple your usable floor space without the expense of modifying your building or moving into a larger facility. Raised Storage Platforms are becoming increasingly popular as they enable more efficient use of existing space, provide affordable solutions to costly problems and offer a good return on investment.

RAISED STORAGE PLATFORMS

BENEFITS

- Engineered and designed to suit local and national building codes
- Custom design solutions available to suit each unique application
- Quick ship standard sizes available as well
- Pre-engineered connections throughout
- All materials come with a tough, durable finish
- Numerous flooring options available including Concrete, Bar Grating, Open Steel Plank, Plywood, Oriented Strand Board (OSB), ResinDek, and Mezzdeck
- Allows additional storage system products such as shelving and carton flow to be used within the mezzanine
- Can be designed to allow use of pallet jacks on elevated floors
- Numerous safety and fall protection devices available for upper levels

Designed and supplied entirely with pre-engineered connections, raised storage platforms can be assembled quickly.

They can just as easily be modified and expanded as requirements increase.

CALL FOR A QUICK, FREE CONSULTATION AND QUOTE

SECURE PROTECTION

SECURITY & FENCING PARTITIONS

Our wire mesh partitions can be purchased for quick delivery or custom designed to your specific needs.

Typical uses for wire mesh partitions:

- Security cages for high value or controlled substances
- Perimeter and machinery guarding
- Security cages for archival record storage or general storage with limited access
- As rack guards to protect from falling debris.

BENEFITS

- Easy to install with a few simple tools
- Pre-configured security cages are available in 2, 3 and 4 sided configurations
- Security cages are available with and without roof panels
- Various types of gates are available including swing, sliding, dutch door and service wicket styles
- Baked enamel finishes available
- Available in standard grey or custom colours (at an extra cost) to suit

TS Wide Span Shelving

TS Wide Span Shelving (sometimes known as Heavy Duty Shelving or Baby Rack) is strong, affordable and extremely versatile. It's ideal for an almost unlimited range of applications, from garage shelving to record storage to retail shelving and warehouse applications; it's great for hand stack operations where heavy capacity pallet racking isn't required. Don't settle for inferior products when the best is so economical

The beams quickly and easily assemble onto the frames like standard pallet rack beams, only they're much lighter. Shelf and deck options include particle board, galvanized shelf panels and wire mesh decks or they can be utilized in various combinations as needed.

BENEFITS

- Rolled step beam design provides strength and safety
- Beams are adjustable on 2" centres
- Standard deck/shelf types available - particle board, galvanized panels and wire mesh decks
- All deck types fit flush to the top of the beam
- Provides unobstructed horizontal access widths up to 96"
- Stock sizes available for quick delivery

METALWARE Shelving

Interlock No-Bolt shelving is among the most rigid in the industry. The shelves are produced from high strength cold-rolled steel and come complete with double-bends on all four sides and closed locking corners. The uprights – “Tee Posts” - are rolled to have a double thickness of steel for added strength and rigidity.

ECONOMICAL • EFFICIENT • STRONG

BENEFITS

Interlok No-Bolt steel shelves are designed for maximum strength and durability. A superior quality shelf has been obtained by combining these exclusive features:

- Double folded closed corners for maximum support
- A two-way locking principle at each corner
- 1 3/16" flange on four sides plus a substantial return bend
- For heavier loads reinforcing bars are embedded in the front and rear of the shelf
- All shelves are pre-punched for Bin Dividers

Easy to assemble, reconfigure and are fully adjustable afterwards without disassembling, Interlock No-Bolt Shelving can be used and purchased as a single bay or multiple bays. Additional bays are easy to add onto existing bays.

Heavy Duty Shelving

SHELVING PICK MODULE

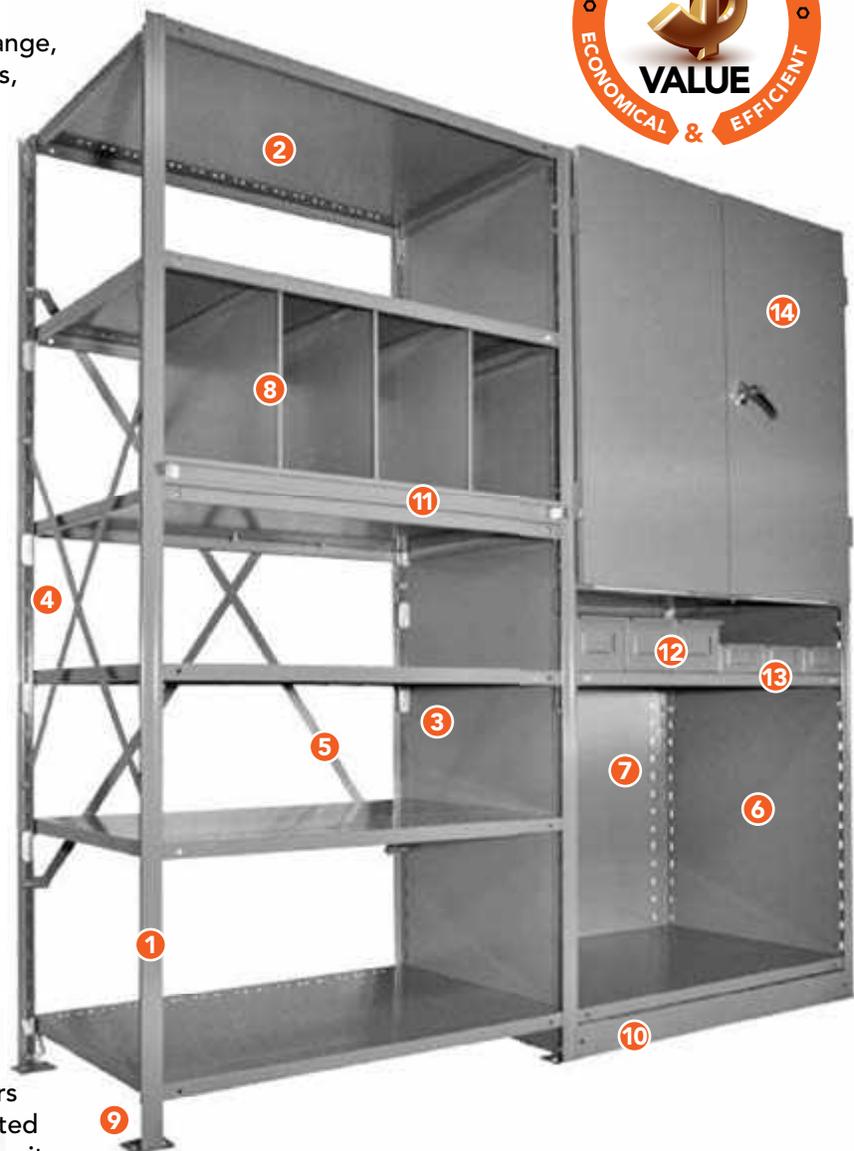

AUTOMOTIVE PARTS STORAGE

HEALTH & BEAUTY PRODUCTS

METALWARE FEATURES:

1. Slotted Tee Post - Adjustable on 2" centres. Two-ply thickness with spot weld fabrication
2. Shelves – waterfall bend with return flange, overlap construction on inside corners, holes punched for bin dividers
3. Shelf Clips – Four compression style clips per shelf
4. Side Sway Braces – stabilizes open shelving units
5. Rear Sway Braces – stabilizes open shelving units
6. End Panel – encloses shelving ends. (2 Tee Posts spot welded to side panel)
7. Back Panel – Steel panel encloses shelving backs. Rectangular slots for mounting, brackets included
8. Bin Dividers – Enables shelves to be divided
9. Bolt-On Base Plate – Provides extra stability
10. Kick Plate – Completes bottom of shelving unit
11. Bin Fronts – 1", 2" or 3" high, they prevent small items from falling off shelves
12. Shelf Drawers – For small parts they come with two galvanized dividers
13. Label Holders – Available in 36", 42" or 48" lengths
14. Cabinet Doors – These 36" wide doors enable the shelving unit to be converted into a storage cabinet with lock-up security

Trucks & Ladders

PALLET TRUCKS

Budget conscious with a 5,000 lbs. capacity, this truck includes:

- Durable entry and exit rollers
- Adjustable push rods to allow for field adjustment
- Ergonomically designed, 3-position handle
- Self-lubricating bushings at all pivot points
- Hydraulic pump with over-load bypass valve
- Minimum fork height of 3"
- Precision steer wheel and rollers

PALLET TRUCKS & ROLLING LADDERS

ROLLING LADDERS

- Lightweight electric welded 1" x 16" gauge round steel tube construction
- Non-slip raised, perforated, dimpled stair treads
- Spring loaded casters
- All standard ladders meet or exceed ANSI-14.7 and OSHA 1910.29, and comply with applicable safety standards as outlined in Ontario Regulation 851
- Durable, hard wearing blue enamel finish

Carton Flow Track

Span-Track® full-width roller carton flow track can be added to any new or existing pallet rack system - no shelves or intermediate supports are required. Tracks can easily be picked up and moved or rearranged by hand to suit your individual SKU's. The beauty of **Span-Track**® is its simplicity and versatility.

TURN ANY PALLET RACK INTO A FULL-WIDTH CARTON FLOW SYSTEM WITH SPAN-TRACK

These full-width flow racks are extremely robust and durable, allowing loading capacities of up to 50 lbs. per lineal ft. while also providing outstanding real world abuse resistance. The full-width 3/4" diameter rollers are made from tempered aluminum and spin on full length 3/16" diameter steel axles.

The roller/axle assemblies are fixed to galvanized steel support channels helping provide a remarkably efficient yet cost-effective carton flow product. The full-width rollers provide evenly distributed contact with the carton, eliminating hang-ups and as a result provide great product flow throughout your system.

Replace your plastic wheels for the last time!

- Heavy Duty, Quality design ensures that it can withstand the roughest of applications
- Seamless and unobstructed rollability
- Excellent lane tracking and re-starting - no sticking even when cartons sit for long periods of time
- Easily adjusted to changing SKU's
- **Span Track**® fits into any new or existing rack structures
- Available in track widths of 6", 9", 12" and 15"

EASILY INCREASE YOUR PICK RATES

INSTALLS WITHOUT TOOLS

PRODUCT IS ALWAYS WITHIN EASY REACH

PANTRY TRACK Span-Track Flow Bed

FLOW BED

ERGONOMIC DESIGN

CARTON FLOW SYSTEMS

ROLLER RACK SYSTEM

Increase Pick Rates by Up to 30% and Pick Faces up to 80%

If you don't have existing racking or would like a stand-alone bay of carton flow racking, Roller Rack is a great option. Roller Rack is available as a complete stand-alone package, with uprights, beams and carton flow track. A complete bay can be assembled in about 1 hour, with no tools required.

Roller Rack easily creates a dynamic storage medium, allowing all picking operations to be performed at the front of the system and replenishment to take place at the back of the system. As cartons are removed from the system on the picking side, new product rolls forward to replace those removed. Carton flow can increase pick rates up to 30% versus static storage and introduces a more ergonomically safe picking process.

BENEFITS

- Roller Rack can be configured to work with two types of flow product – Span Track® or Flow Bed®
- Ultra durable, with capacities of up to 50 lbs. per lineal foot
- Easily customized to fit your specific needs with standard "mix & match" components
- Simple to reconfigure or add additional bays
- Easy to assemble, no tools or hardware required
- Additional productivity accessories and enhancers available
